CONCURRENT RECEIPT OF OLD AGE ASSISTANCE AND OLD AGE AND SURVIVORS
INSURANCE IN MONTANA, JULY 1948

The Montana Department of Public Welfare together with other state agencies administering public assistance programs in the United States, was requested by the Bureau of Public Assistance of the Social Security Administration to secure data relating to Old Age and Survivors Insurance in order to throw light on the extent to which such insurance fails to provide minimum security and on the extent to which the inadequacy of benefits adds to public assistance loads and costs. Accordingly in July of this year, the entire Old Age Assistance caseload consisting of 10,831 recipients was surveyed to determine the number receiving Old Age and Survivors Insurance and Old Age Assistance concurrently and to determine the amount of OASI benefits by recipients of OAA.

Of the 10,831 recipients of OAA, only 587 (5.4%) were reported as receiving OASI benefits. The number ranged from none in seven counties to 92 in Silver Bow County (see accompanying table). The average OASI benefit per recipient was \$17.93 and the average OAA payment to those recipients was \$33.13. It is obvious, therefore, that, while OASI benefits constitute a substantial part of the monthly income of those OAA recipients having such benefits, benefits at present are not large enough to provide maintenance on a subsistence level and, where other income is not available, must be supplemented by public assistance. In addition, the small number of OASI recipients in the OAA caseload is a definite indication that present OASI coverage is inadequate in a predominantly agricultural state such as Montana.
